

## The BRIDGE (Halogen Free)

Being the result of our aim to make the best twin-lead loudspeaker cable for the lowest possible price, The BRIDGE is a slim and highly flexible 2x(1.97 mm<sup>2</sup> / ~AWG 14) quality cable, suitable for all amplifier to speaker connections.

With its great price to performance ratio, The BRIDGE furthermore forms an ideal match and perfect companion with our similarly conceived and highly acclaimed multi-purpose AV interconnect The NAME.

The secrets of sound quality and cable durability lie in the quality of manufacture and materials used. Our more than 25 years of experience in cable design and production of course also is an important ingredient!

As such The BRIDGE features:

- **Heavy silver coated multistrand OFC conductors**  
Both very flexible signal conductors consist of 98 strands of high purity dense silver coated - high purity Matched Crystal Oxygen Free Copper (OFC). This high quality composition maintains signal integrity and provides maximum durability. Signal quality that lasts!
- **Minimal signal loss**  
The BRIDGE's low loop resistance of 0.018 Ohm/m (and its low parallel capacitance of 35 pF/m) allows your amplifier to maintain full control over your speaker drivers' movements. Solid and tight bass, as well as natural, open and nonfatiguing mids and highs are yours to enjoy!
- **High-grade connectors**  
Also the quality of the connectors makes a considerable contribution to a cable's overall performance. The BRIDGE comes fit as desired with either our spade/banana interchangeable Bus type Universal Speaker Connectors or our spade or banana DIY Screw-On Speaker Connectors . Both connector types are of the same high quality as found with our up-range speaker cables: Being non-magnetic and heavy 24 carat gold plated, they provide a perfect and durable connection.
- **Excellent protection and durability**  
Last but not least, The BRIDGE's heavy silver coated conductors, as well as its flexible, rugged and hardwearing HULLIFLEX<sup>®</sup> 4 jacket provide an optimal protection against chemical (corrosive) attack from the outside world and ensure a very long lifespan.

Employing durable materials and providing super sound quality at a very affordable price, our The BRIDGE is the ideal speaker cable for the demanding, yet budget oriented listener. The BRIDGE is available:

1. In any length with, as desired, either our 3.0 mm. Ø cable entrance diameter Bus type Universal Speaker Connectors or our DIY Screw-On Speaker Connectors mounted.
2. On 100 m. reels:

Shipping: 1 x 100 m. reel in a 310 x 310 x 290 mm. box with a total shipping weight of 8.2 kg.

<b>Cable Type:</b>	Twin conductor
<b>Conductor Material:</b>	High purity dense Silver coated high purity Matched Crystal OFC
<b>Design Purpose/ Application Area(s):</b>	Loudspeaker cable
<b>Eff. Conductor Ø/Eq. AWG No./Strands:</b>	2x(1.97 mm <sup>2</sup> / ~AWG 14 / 98)
<b>External Diameter / -Dimensions:</b>	12.5 mm. wide; 4.0 mm. thick
<b>Resistance 20 °C / 68 °F:</b>	0.90 Ohm/100 m.
<b>Capacitance:</b>	35 pF/m.
<b>Insulation / Dielectric Strength / Test Voltage:</b>	HULLIFLEX <sup>®</sup> 4 / 300 Vrms min.
<b>Connector Types Suitable:</b>	Our 3.0 mm. Ø cable entrance diameter Bus type Universal Speaker Connectors or our DIY Screw-On Speaker Connectors; Both custom mountable on ordered lengths.
<b>Standard Sales Units / - Lengths:</b>	100 m. reels; With connectors mounted to specifications: any length; Without connectors: please consult your van den Hul dealer or the van den Hul distributor in your country.
<b>Jacket Colours Available:</b>	Matt light beige
<b>Remarks:</b>	Other twin-lead speaker cables in our AWG 14 range are: The CLEARLINE, The SKYLINE HYBRID, The SNOWLINE, The CLEARWATER and The GOLDWATER. Our multi-purpose AV interconnect The NAME is an ideal match and perfect companion in quality and price.
